ABOUT ME

I am a first-semester Computer Science student with a strong interest in technology, programming, and cybersecurity. I enjoy learning new concepts and applying them in small academic and personal projects. My current focus is on developing a basic understanding of programming, web technologies, and ethical hacking fundamentals. I aim to build a solid foundation in computer science and contribute to innovative tech solutions in the future.

PROJECT EXPERIENCE

Cyber Security Awareness Project — College Semester Project (Nov 2025)

- Designed and presented a project on basic cybersecurity principles and ethical hacking awareness.
- Demonstrated how to identify phishing emails and protect personal data online.
- Gained experience using tools such as Wireshark and Nmap for basic network analysis.

Project Experience

My Hobby Web Page — HTML & CSS Mini Project (Oct 2025)
- Created a simple, responsive web page using HTML and CSS to demonstrate web design fundamentals.
- Applied semantic HTML structure with header, nav, and footer sections.
- Learned basic page layout design, image linking, and list formatting in HTML.

PROJECT Experience / Technical Exposure

Cyber Security Fundamentals Workshop — Online / College Event
- Attended a one-day workshop introducing ethical hacking tools and security practices.
- Learned about password protection, malware awareness, and safe browsing techniques.
